Experience

Java Full-Stack Developer Intern

Jun 2026 – Present

HCLTech, Noida

- Developing full-stack features using Java Spring Boot on the backend and TypeScript on the frontend as part of an enterprise development team.
- Building and maintaining REST APIs and UI components, collaborating with senior engineers on production-grade code reviews and deployment practices.
- Contributing to a Background Verification (BGV) platform within a 3-member team, designing a PostgreSQL schema across 3 core tables and building a TypeScript frontend supporting 5 document formats.

Software Development Intern

Feb 2026 – Jun 2026

VoyageX AI, Gurgaon (Haryana Government-funded maritime startup)

- Built an online/offline data sync system using Firebase and a local SQLite database, enabling uninterrupted app usage in low-connectivity maritime environments.
- Designed a timestamp-based conflict resolution strategy to reconcile offline edits with server state on reconnection, supporting approximately 120 users across 5–6 vessels.
- Implemented Firebase Cloud Functions and Firestore security rules to enforce data access control, working within a 3–4 member engineering team.

Projects

Cloudflare R2–S3 Package

GitHub

- Published an npm package simplifying Cloudflare R2 operations via the AWS S3-compatible API, reaching 280+ downloads and adoption across multiple backend projects.

Thunderstreams – Video Streaming Platform

GitHub

- Built a full-stack video-on-demand platform with a React Native Android app and web interface.
- Implemented Adaptive Bitrate Streaming (MPEG-DASH) for seamless playback across varying network conditions.
- Integrated Cloudflare R2 via the S3 API for segment delivery, reducing streaming latency.

Ed-Era – Live Streaming Application

GitHub

- Developed an educational live-streaming system enabling real-time lecture broadcasts and recording.
- Built a low-latency RTMP + HTTPS server with adaptive multi-quality streaming via FFmpeg.

ShopNext – E-Commerce Platform

GitHub

- Built a microservices-based e-commerce app with JWT authentication and Google OAuth.
- Integrated Razorpay payments and managed assets via Cloudflare R2 (S3 API).

Skills

- **Languages:** Java, TypeScript, JavaScript, SQL
- **Frameworks:** React.js, React Native, Node.js, Express.js, Spring Boot
- **Databases:** MongoDB, MySQL, PostgreSQL, SQLite, Firebase Firestore
- **Cloud & DevOps:** AWS, Firebase (Cloud Functions, Security Rules), Cloudflare R2, Docker, Microservices
- **Tools & Concepts:** REST APIs, JWT, FFmpeg, RTMP, Adaptive Bitrate Streaming (DASH)

Education

B.Tech in Computer Science (Data Science)

2022 – 2026

J.C. Bose University of Science and Technology, YMCA, Faridabad

Achievements

- Solved 500+ DSA problems on LeetCode (Global Rating: 1500+).
- Secured 98.18 percentile in JEE Mains; qualified JEE Advanced (AIR 16K).
